

windows 8.1.

PREREQUISITES FOR SETTING UP EDUROAM ON WINDOWS 8.1

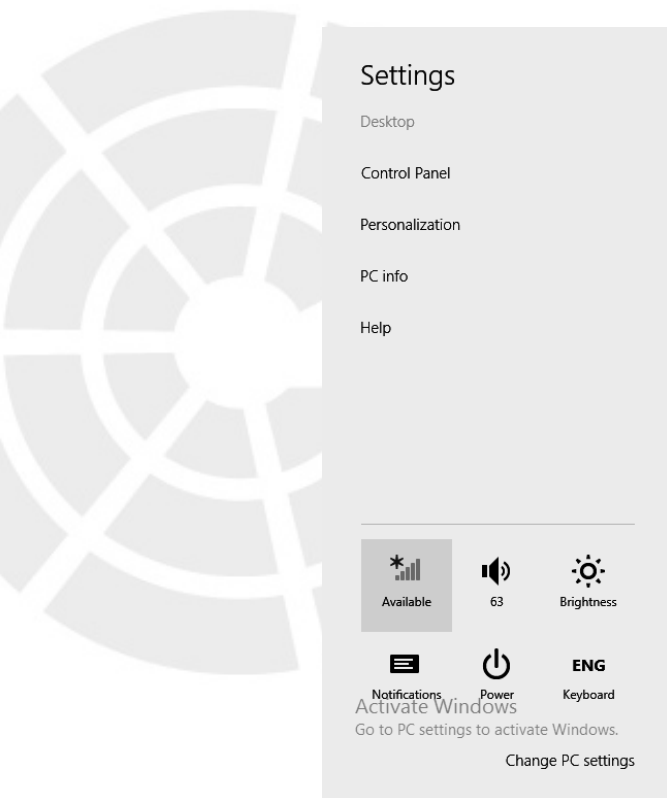

- mobile device running Windows 8.1 with a network interface card/WiFi
- WiFi - switch  is activated
- you are within range of a MCI access point

CONFIGURATION & CONNECTION

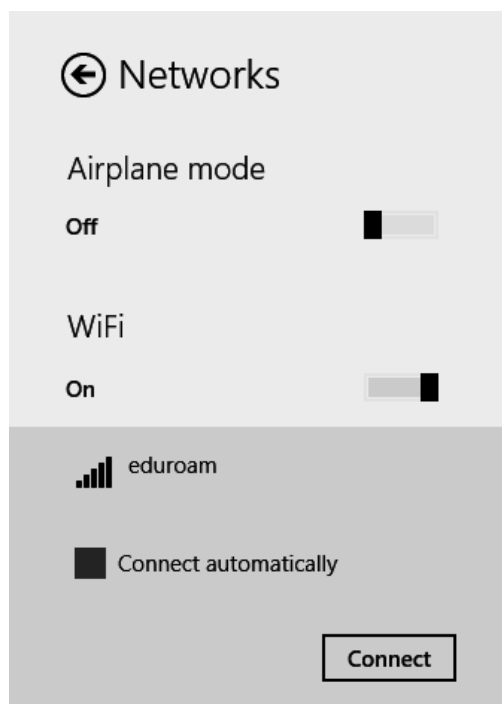

- open the Charm bar and select „**Settings**“

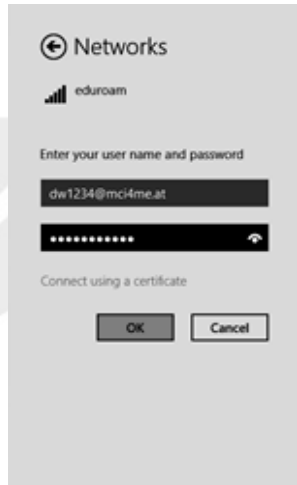

- click the WiFi - symbol „**Available**“:

- choose "eduroam" and „**Connect**“

- In the authentication-window
 - **Students:** type your **user-ID (e.g. dj1234@mci4me.at) and your password.** Please note: if you never changed your default password to a new password (or changed your password on or before June 20th, 2010) change it on <https://my.mci4me.at>.
 - **MCI staff:** type your user-ID (e.g. jed@mci4me.at) and your password. You can change or reset your password on <https://my.mci4me.at>.
 - **Visitors:** Please type your user & password from your MCI WLAN-Voucher.

- Confirm by clicking the „OK“-button.

Congratulations, you are now connected to the internet via eduroam™.

KNOWN PROBLEMS

Many problems are caused by outdated driver software. Please install the most recent driver software for your WiFi hardware. Do not use the driver software provided by your notebook manufacturer, but the one provided by your WiFi-hardware manufacturer, because they generally provide the most recent driver software.

Please use the pre-installed WiFi management software by Windows of your device and do not use alternative management software provided by your notebook-manufacturer such as Sony Smartnetwork or similar.
